

believe...

...there is a low cost, high-speed
DSL modem out there...

The search for a DSL modem is over.

This FREE high-performance USB evaluation modem is your low cost solution for providing high-speed Internet access to your residential and SOHO customers. The Skyrocket modems are highly interoperable. Which means they work with most DSLAMs* on the market today. And they provide the added bandwidth consumers are searching for.

Offered in both USB and PCI "plug and play" formats, these modems eliminate the need to install and configure additional connections. DSL deployment is easier, faster and less expensive.

ADC's Skyrocket DSL modems will make a believer out of you.

FEATURE HIGHLIGHTS:

- Data rates up to 1.5 Mbps downstream and 928 kbps upstream
- 2-click installation for quick and easy setup over a regular phone line
- HomePNA-friendly
- Rate adaptive to adjust for transmission distance and line condition, providing the best data rate to subscribers

*To order additional Skyrocket USB or PCI modems, contact your ADC sales rep or call 800.370.9670. Free Avidia software upgrade may be required to operate Skyrocket modems with Avidia.
